HOW TO READ YOUR WATER METER
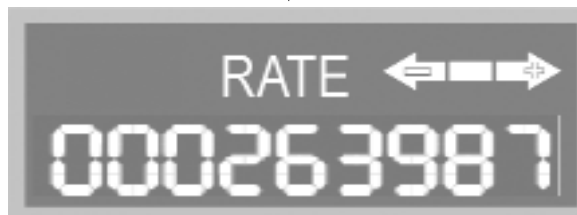

Solar Panel

LCD Display

The City of Markham will read your meter for billing purposes, but **should you wish to monitor your own consumption**, here's how:

♦ Continually shine a flashlight over the solar panel (located on the register) to activate the LCD display *

♦ Take a reading at a set time of the day

♦ Take a 2nd reading at the same time the next day

♦ The difference between the two readings is your daily water consumption

• Note: when the register display is first activated via a flashlight, all icons will be briefly displayed followed by firmware information. The register display will then toggle (every 4 seconds) displaying the reading and then the flow rate. The flow rate is per minute. When the display indicates "RATE", the flow rate is being displayed.

RATE ⇐ ■ ⇒
000263987

The 9 digit LCD displays your meter reading in cubic metres
The last 4 digits of the reading are decimal points.
(e.g. – 26.3987 cubic metres)
(decimal will be displayed)

Flow Indicator
– displays direction of water flow

♦ **ON** – water in use

♦ **OFF** – water not in use

♦ **(–)** - indicates reverse flow

♦ **(+)** – indicates forward flow
